

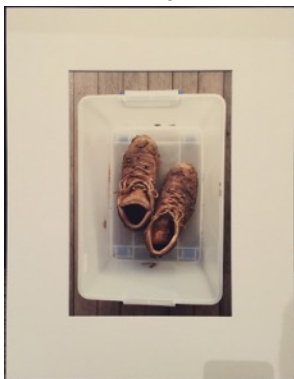

Photographing your artwork

Here are tips to help you take good quality photos of your artwork to submit on-line:

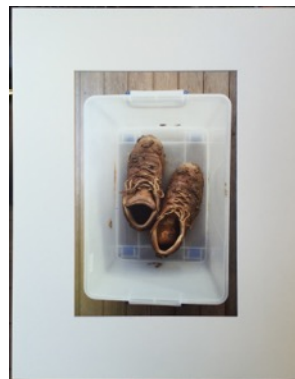

1. **You don't need a fancy camera — you can use your phone.**

2. **Natural light.**

Artificial light can make the colours look odd. Take photos in an area with lots of natural light but avoid direct sunlight.

Incorrect - artificial light

Correct - natural light

3. **Get close.**

Don't leave dead space around your artwork.

Incorrect - lots of dead space

Correct - tightly framed

4. **Get straight on.**

Taking a photo from above, below or the side distorts perspective. Get straight on to your artwork.

Incorrect - from an angle

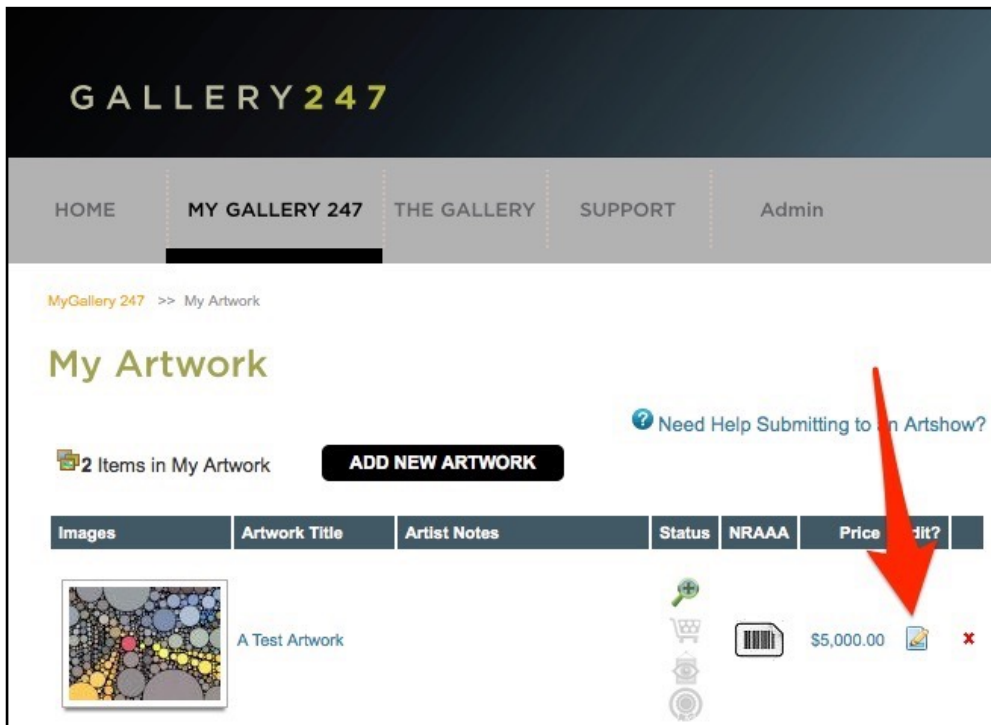

Correct - straight on

Uploading your photos

Step 1 — Log in to Gallery247 using your user name and password.

Step 2 — Click on MY GALLERY 247 > My Artwork

Step 3 — Click on Edit?

Step 4 — Upload the photos
